CLAIMS:

1.   A method of creating a view (V) on a computer screen (3), the method comprising the steps of:

          the computer (2) receiving a request from a user to create a view, the request comprising a location indication,

          the computer (2) determining, on the basis of the location indication, both a view location and view dimensions, and

          the computer (2) displaying a view (V) having said view location and said view dimensions.

2.   The method according to claim 1, wherein the location indication comprises a point on the screen indicated by the user.

3.   The method according to claim 2, wherein the view has a center which substantially coincides with the point on the screen indicated by the user.

4.   The method according to any of the preceding claims, wherein the view dimensions are as large as possible.

5.   The method according to any of the preceding claims, wherein the computer provides view activation points (P) on the screen, each view activation point corresponding with a view having predetermined view dimensions.

6.   The method according to claim 5, wherein the computer provides at least two different types of view activation points (P_1, P_2), one type corresponding with views having a fixed size.

7.   A device programmed for carrying out the method according to any of claims 1 to 6.

8.   The device according to claim 7 which is a desktop computer (1), a laptop computer, a palmtop computer, a PDA or an electronic organizer.

9.   A software product for carrying out the method according to any of claims 1 to

5   6.

10.   An information carrier, such as a CD-ROM, provided with a software product according to claim 7.
